FIREPLACE XTRORDINAIR

DELUXE GAS FIREPLACE INSERT COLLECTION

NORTH AMERICA'S Lopi FAVORITE FIRE

The 32 DVS Deluxe shown with the Fireplace Xtrordinair® Metropolitan™ Face, Classic Oak Logs Set, Black Glass™ Fireback, and a 4-Sided Custom Finish Panel

The World's Finest Collection of Gas Fireplace Inserts

"Over 40 years ago in 1979, I founded the Lopi® brand of premier stoves and fireplace inserts. Our reputation for solid craftsmanship, reliable performance and unbeatable heating efficiency has been a winning combination and the favorite fireplace insert of families across North America.

Ten years later, Travis Industries purchased Lopi® and we added the iconic Fireplace Xtrordinair® brand, known as North America's leader in premium fireplaces and fireplace inserts. These two fabulous brands have merged together under one roof to bring you the greatest collection of gas fireplace inserts in the world.

These fireplace inserts are the best money can buy. We have a worldwide reputation for award-winning innovations in fireplace insert design, and yet the most significant recognition to me is when a family entrusts us to be their fireplace insert of choice.

Take your time, enjoy looking through this catalog and keep the home fires burning."

Kurt W. F. Rumens,
President & Director of Product Design
Travis Industries, House of Fire

All Fireplace Inserts Are Not Created Equal

We offer six extraordinary models of premium gas burning fireplace inserts from both Lopi® and Fireplace Xtrordinair®. All models embody the same attention to detail in design, aesthetics and construction.

The exterior look and style of designer faces are what distinguishes these models from one another.

The 32 DVS & 34 DVL models feature a wide selection of four-sided designer faces with beautiful styling that evenly surrounds the fire on all four sides. These models are the perfect choice for anyone seeking an architecturally balanced look with a timeless presentation of fire.

The 430 & 616 models offer a more contemporary look with three-sided designer faces that have minimal framing along the bottom. This extends the glass down to the hearth and creates a larger fire-viewing area that resembles an open masonry fireplace.

Innovations

We are known the world over to be the most creative group of innovators and designers, bringing life to innovations such as:

- Ember-Fyre® II (page 4)
- Ember-Glo™ (pages 4, 28-29)
- GreenSmart® (pages 28-29)
- Comfort Control™ (pages 28-29)

The Mod-Fyre™ Burner

Experience the remarkable Mod-Fyre™ Burner, showcasing tall, dancing flames accentuated by under-lit floor lighting surrounding the burner. This imparts a sophisticated, modern aesthetic that seamlessly complements our range of sleek crushed glass media options. Alternatively, pair it with our Ember-Glo™ Glass & Rock Embers media for a transitional look, mimicking the warm glow of coals across the firebox floor.

The Mod-Fyre™ inserts offer adjustable overhead accent lighting, allowing you to showcase your chosen media with flair. This feature enhances the overall dramatic presentation of your fire, ensuring a visually stunning and customizable experience.

Scan this QR Code to watch the 430 Mod-Fyre™ burning.

The Ember-Fyre® II Burner

Inspired by our popular award-winning Ember-Fyre® Burner, the new Ember-Fyre®II offers the next generation of high definition, wood-like burner technology and features 30% More Visual Fire! This stadium style burner features Ember-Glo™ ember bed lighting and multiple levels of dancing flames, to give you 30% more visual fire than any other insert brand with the same BTUs!

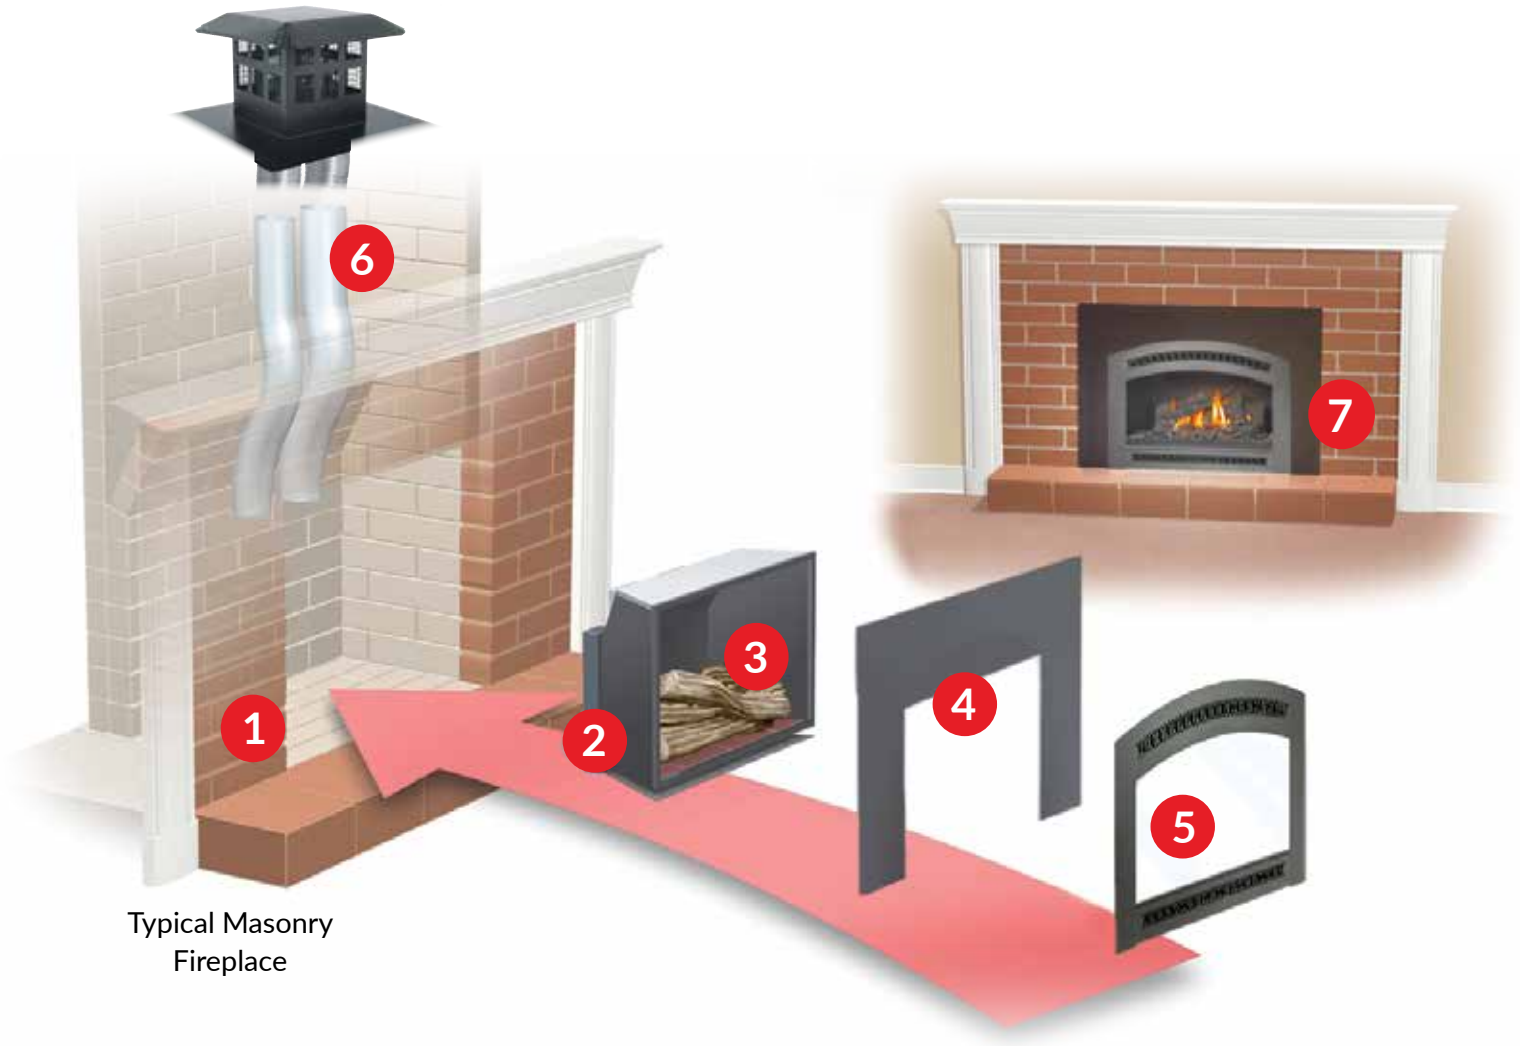
AN INSERT FOR EVERY FIREPLACE

Turn Your Fireplace Into An Efficient Heat Source

Lopi® and Fireplace Xtrordinair® gas inserts allow you to enjoy a gorgeous, glowing fire without losing heat out of your chimney. These inserts are designed to transform virtually any masonry or zero clearance (metal) fireplace into an efficient source of heat. Traditional, open fireplaces can have efficiency ratings as low as 15%, and depending on the condition, can actually draw the heat out of your home for a net heat loss. Our heater-rated gas inserts achieve steady state efficiency ratings as high as 87%.

All of Our Gas Inserts Feature Direct Venting

All of our gas inserts feature an efficient co-linear direct venting system. This dual-liner system allows for direct venting through an existing masonry chimney with one liner to vent exhaust and the other liner to provide combustion air and maintain indoor air quality.



Typical Masonry Fireplace

1. Measure Your Existing Masonry or Metal (Zero Clearance) Fireplace
2. Select the Insert That Best Fits Your Fireplace
3. Choose A Log Set
4. Select A Finish Panel
5. Pick One of the Designer Faces
6. Add the Co-Linear Direct Vent Chimney
7. Enjoy the Heat!

32 DVS DELUXE WITH EMBER-GLO™ MID-SIZED GAS INSERT

Traditional 1,500 Square Foot Heater

The 32 DVS Deluxe is an efficient way to heat homes and living spaces up to 1,500 square feet. This mid-sized insert features a big ceramic glass viewing area, the incredible Ember-Fyre® II Burner and Comfort Control™, which allows you to turn down the heat output while maintaining the beauty of the fire. This model offers you the choice of high definition detailed log sets and a wide variety of designer faces. The 32 DVS Deluxe comes standard with our most popular features, namely, an adjustable top Accent Light, a 180 CFM convection fan, Ember-Glo™ ember bed lighting and the GreenSmart® Remote Control.

Insert Choices *See Pages 18-24*

- Wide array of designer faces
- Choice between Classic Oak Logs, Birch Logs or Driftwood Fyre-Art™
- Six optional fireback choices
- Choice of small and large one-piece panels. Custom fit panels are also available.
- Optional Hidden Wiring Kit allows you to hard wire the insert from within the firebox

430 DELUXE WITH EMBER-GLO™ MID-SIZED GAS INSERT

Traditional 1,500 Square Foot Heater with Large Viewing Area

The 430 Deluxe is a beautiful insert that is ideal for providing supplemental heat to homes or living spaces up to 1,500 square feet. Featuring 430 square inches of ceramic glass, this model has a larger fireview than most inserts its size. The ceramic glass extends down to the hearth to offer a "clean face" look that resembles a traditional masonry fireplace. This model features Ember-Glo™ ember bed lighting, the Ember-Fyre®II burner and Comfort Control™ to accommodate your year-round heating requirements. More standard features include the GreenSmart® Remote Control, top Accent Light and a 180 CFM convection fan.

Insert Choices *See Pages 18-24*

- Wide array of designer faces
- Choice between Classic Oak Logs, Birch Logs or Driftwood Fyre-Art™
- Five fireback choices (required)
- Choice of small and large one-piece panels. Custom fit panels are also available.
- Optional Hidden Wiring Kit allows you to hard wire the insert from within the firebox

Specifications

430 MOD-FYRE™ DELUXE MID-SIZED GAS INSERT

Transitional 1,500 Square Foot Heater with Large Viewing Area

Experience the captivating warmth of the 430 Mod-Fyre™ Deluxe Gas Insert, showcasing an impressive presentation of tall, dancing flames. The 360-degree under-lit floor envelops the burner, creating a mesmerizing display. Ideal for heating homes or living spaces up to 1,500 square feet, this model stands out with its generous 368 square inches of ceramic glass, providing a more expansive fireview compared to similar-sized inserts. Embracing a "clean face" aesthetic reminiscent of a classic masonry fireplace, it combines style with functionality. Plus, with Comfort Control™, this insert is designed to meet your year-round heating needs effortlessly. More standard features include the GreenSmart® Remote Control, top Accent Lighting, and a 180 CFM convection fan. Learn more about our exciting GreenSmart® features on pages 28-29.

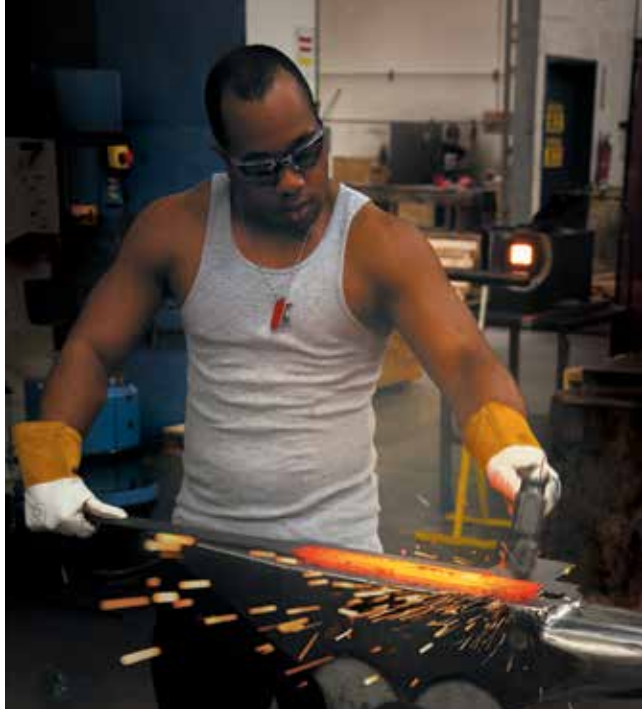
CUSTOM SHOP FACES

Hand-Forged Designs

Each face is hand crafted by in-house blacksmiths through a skillful and labor intensive metal forging process. From start to finish this process requires focus, stamina and an artful eye. Every individual piece of metal is heated in a forge at extremely high temperatures, hand-hammered and worked multiple times to complete an authentic finished product with textured surfaces, hammered edges and incredible attention to detail. Each face is an individual custom work of art

Charcoal Painted Finish

Offering a unique alternative to the classic black painted look, the Charcoal Painted Finish features more rich and lustrous metal tones.



Marcus, one of our master craftsmen, works on hand-forging parts for our beautiful Timberline™ face.

FIREBUILDER.TRAVISINDUSTRIES.COM

7-YEAR "REAL WORLD" WARRANTY

Our 7-Year Warranty offers more protection on key components than the so-called "Limited Lifetime" warranties of our competitors. Lopi® and Fireplace Xtrordinair® build inserts to last a lifetime. We'll stand behind the quality and performance of our products year after year because that's the way we do business - and you don't have to read the fine print for your peace of mind. We even continue to sell service parts that date back 40 years.

YEARS 1-2: All parts and labor on your appliance, including blower.

YEARS 3-5: All parts and labor on the firebox, door assembly and air control assemblies.

YEARS 6-7: Parts only on firebox, door and air control assemblies.

YOUR SAFETY IS OUR NUMBER ONE CONCERN

All of our gas inserts are very safe to own and operate in your home.

Lopi® and Fireplace Xtrordinair® gas insert faces come standard with ANSI-compliant ClearFire™ glass screens. This provides a safety barrier that protects against accidental contact with the hot glass surfaces and reduces the potential for injury. These screens are practically invisible and are so discrete that they do not detract from the fire view in any way.

GREENSMART™

All of the Deluxe Gas Inserts in this catalog feature the patented GreenSmart® System. This proprietary system is the most innovative collection of components, controls, and technology that when combined provides an elegant, greener, and smarter way to heat your home.

GreenSmart® Deluxe Multi-Function Wireless Thermostat Remote Control

- Two Thermostat Modes
- Change Between IPI GreenSmart® and CPI Pilot Modes
- Flame Adjustment (6 levels)
- Convection Fan Operation (6 levels)
- Accent Lights (6 levels)
- Comfort Control™ (Controls rear burner)
- Ember-Glo™ ember bed lighting

Manual Setting ON/OFF
Fire and fan stay where you manually set it.

Thermostat Setting
Fireplace insert turns ON/OFF to maintain your desired home/room temperature.

Smart Thermostat Setting
Automatically adjusts the flame height based on the temperature setting, so the flame will modulate up/down as opposed to shutting ON/OFF like normal thermostats. This setting conserves fuel and maximizes the unit's heating ability while extending the viewing pleasure of the fire.

Choice of Pilot Modes - Easily Switch Between IPI & CPI Modes:

IPI GreenSmart®- Intermittent Pilot Mode
Use in summer or milder heating days to reduce gas consumption from the pilot. The pilot only turns on when the unit calls for heat, saving more energy.

CPI - Continuous Pilot Mode
Use in fall/winter or in cold climate areas. CPI keeps the pilot on at all times. This warms the vent system to maintain a strong draft in your chimney and reduce moisture condensation on the glass. This system includes a battery back-up, ensuring proper ignition, even during power outages.

Flame Adjustment
Adjusts the height/heat of the flame. 6 levels of flame heights to choose from.

Convection Fans
Circulates room air around the firebox and delivers heated air into your home. 6 speeds to choose from.

Accent Lights
Adds a warm glow to the logs and firebox interior. Accent Lights can be used when the fire is on or off, allowing for visual enhancement of your insert 365 days a year. 6 levels to choose from.

Accent Lights Off

Accent Lights On

Comfort Control™
Comfort Control™ turns off the rear burner while leaving the front burner on for an attractive flame appearance when heat output is not the priority. This feature offers a turndown ratio of up to 75% and provides a more efficient way to heat your home.

Ember-Glo™
Ember-Glo™ combines adjustable halogen under-lighting with colored glass and embers in front of the fire to provide an amazingly realistic ember bed effect.

PROFESSIONAL HEARTH DEALERS

Only the most professional specialty hearth retailers are selected to sell Fireplace Xtrordinair® and Lopi® fireplace inserts. They represent our total commitment to exceptional products and excellent service. In addition, they have successfully completed special training programs in the proper selection, installation, and service of all Fireplace Xtrordinair® and Lopi® products.

Your professional Fireplace Xtrordinair® and Lopi® hearth dealers are experts who can advise you on everything from customizing the color of your appliance to selecting appropriate venting and chimney materials.

ADDITIONAL HEARTH PRODUCTS

Fireplace Xtrordinair® and Lopi® produce a wide variety of quality wood, pellet and gas appliances. Find your favorite fire today by visiting: www.TravisIndustries.com. Take some time while there and explore our other brands like DaVinci Custom Gas Fireplaces™ and our captivating collection of outdoor firepits, fireplaces and torches by Fire Garden™.

TESTED & CERTIFIED

ANSI Z21.88-2014/CSA 2.33-2016 "Vented Gas Fireplace Heater", CGA 2.17-M91 (R2009) "Gas Burning Heating Appliances for Manufactured Homes", and CSA P.4.1-15 Testing method for measuring annual fireplace efficiency. We recommend all Fireplace Xtrordinair® and Lopi® appliances be installed and maintained on an annual basis by your Specialty Hearth Retailer.

Improper installation of your gas appliance or failure to operate it in accordance to the guidelines detailed in the Owner's Manual may negate your warranty and endanger your home and family. Installation information is available on our website at www.TravisIndustries.com.
